

Windows Messenger or via SMS on a mobile phone, for example. This smart delivery not only enables fast and efficient notification but also avoids costly duplication of notifications on multiple channels.

“We are thrilled about this opportunity to provide the Indigo presence and IM dimension to the long-established Alertim solution,” said Marijke van Remortel, Director of Sales and Marketing at Indigo Software. “With people wanting or needing to remain on the ball wherever they may be, the power of presence and IM ultimately ensures timely delivery of content that can be extremely important,” continued Marijke.
