FOR IMMEDIATE RELEASE

**INTERNET TELEPHONY CONFERENCE & EXPO SAN DIEGO 2001
NAMES INDIGO SOFTWARE BEST OF SHOW**

*Indigo's latest accomplishment, the Indigo MMStreamer™ awarded Best of Show
by industry analysts at Internet Telephony Conference & Expo 2001*

SAN FRANCISCO, CA – October 30, 2001 — Technology Marketing Corporation (TMC™)'s Internet Telephony Conference and Expo has named Indigo Software's MMStreamer Best of Show award winner from top communications technology companies exhibiting this month in San Diego.

The Best of Show awards emphasize technological innovation and product feature sets. After submitting a thorough application and demonstrating their product on the Internet Telephony Expo show floor, a selection of companies that aid in the development of next generation VoIP solutions were rewarded. "Indigo Software and their innovative product the Indigo MMStreamer , are a stand-out indication of why so many enterprise buyers, developers and service providers flock to Internet Telephony Conference & Expo," said TMC President and Conference Chairman, Rich Tehrani. "Indigo's innovation and

commitment to quality attract serious prospects to their booth, where attendees know they'll find solutions that can help them in their businesses today."

The Indigo MMStreamer is a SIP (Session Initiation Protocol) User Agent, which combines a SIP signaling engine with a Java technology-based real-time media streamer, allowing the establishment of simultaneous bi-directional audio and video streams within the same session. "In a corporate environment where time and flexibility clearly impose themselves as key components of future success, our means of communication can only adapt to this reality. The SIP-based Indigo MMStreamer takes those factors into account and, being a full software implementation, it eliminates the need for dedicated hardware, such as expensive digital signal processors", said Nicolas Dramais, Product Manager at Indigo Software.

"We are delighted that the Indigo MMStreamer has been awarded this accolade," said Chris Altree, Business Development at Indigo Software. "The enthusiasm shown by all those who saw it in action at our booth is confirmation of the product's wide-ranging appeal."

The Indigo MMStreamer is part of a complete portfolio of SIP-based products, consisting of a tight ensemble of SIP servers - Proxy, Registrar, Redirect, Location – a CPL (Call Processing Language) Server and other end user products such as the Indigo CPL Editor™, and the Indigo PIM (Presence and Instant Messaging) Client™.

About TMC™

Since its inception in 1972, Technology Marketing Corporation (TMC) has produced industry-leading trade magazines and events focused on technology and telecommunications, and dedicated to providing information and educational insight about industries that had not received journalistic representation. The philosophy of professionalism and unbiased, in-depth education -- coupled with the respected product reviews of TMC Labs -- is what sets TMC publications and conferences apart from its competitors. For more information about TMC, visit its Web site at www.tmcnet.com.

About Indigo Software

With operations in both the US and Europe, Indigo Software is a forward-thinking software developer, architecting new Internet communications solutions for a broad range of service providers, including ISPs, communications ASPs, IP carriers and Next-Gen operators. Capitalizing on its award-winning, expandable communications software framework, Indigo provides a unique ensemble of Internet-infrastructure software components based on Session Initiation Protocol (SIP) and other Internet-genuine technologies sharing SIP's endowments. Devising unprecedented communications software solutions for converged networks, Indigo gives an ever-expanding service providers market the power to transform the experience of integrated communications for a generation of customers with Internet savvy.
